

# BASIX VALVE TYPE T/H EPDM

ART. NO. 450141E

## GENERAL

-  The KEOFITT BASIX Sampling Valve is our CIP-able sampling valve for less demanding applications. Replaces non-hygienic sampling cocks. More than 20 different configurations available.
-  The sampling valve can be used for any process sampling for chemical and/or physical analysis.
-  Cleaning: Valve in open position: Cleanable by means of CIP using the detergent solution suitable for the actual process media. For further advice, please contact Keofitt. Not recommended for autoclave due to plastic parts.
-  Designed for sampling of liquids with a viscosity of up to approx. 100 cP containing no particles larger than Ø1.5 mm. Sampling of more viscous liquids is possible, only will it take longer (depending on process pressure).

## FEATURES

-  Installation: Tank welding
-  Operation: Turn knob - spring loaded (opens counterclockwise)
-  Head assembly: Hand tight using a tommy bar or maximum 15 Nm. Tommy bar included (#900118).
-  Outlet: Hose piece
